EXL TOURNEY

Skill tournaments & duel rooms on Seeker.
Same run for everyone. Prizes on-chain.

7 games live on the Solana dApp Store · SOL + SKR · open source (Apache-2.0)

excobalab · Ankara, Türkiye · Solana Mobile CLOCK IN Hackathon · Oct 2026

THE PROBLEM

Mobile crypto games pay nothing, or pay by luck

CASUAL PLAYERS

Won't install a "web3 game". They will play a good game that happens to pay — if entering takes one tap.

TRUST

Closed leaderboards, hidden seeds, manual payouts. Nobody can check whether the winner really won.

SKR HAS FEW DAILY USES

72k+ wallets hold SKR; most of it sits staked. There is almost nothing to do with it every day.

THE PRODUCT

Seven casual skill games, one tournament layer

Sol Jump | Sol 2048 | Sol Snake | Sol Stack | Sol Tiles | Sol Dodge | Sol Bubble

TOURNEYS

Daily · weekly · monthly pools in SOL or SKR.

One server seed per tournament — everyone plays the same run.

ENTER from Seed Vault in one tap. Prizes auto-paid on-chain.

DUEL ROOMS (v2.0)

Players open their own room: stake, players (2–10), joining & playing clock, prize split, private code or public list.

Starts when full. One run each. Ties split. Under-filled → auto refund.

FAIRNESS IS THE FEATURE

Don't trust us — verify

Telemetry plausibility ceilings today; deterministic replay verification and an Anchor escrow program are next. Public proof: web3.excobalab.com/proof/?id=<tournament>

BUILT FOR SEEKER

Deep Solana Mobile Stack integration

SEED VAULT / MWA 2.0

Payment (SOL transfer or SKR TransferChecked + memo) and score signing via signMessages. Phantom deeplinks as fallback on other Android phones.

SKR FIRST-CLASS

SKR pools and SKR duel rooms: entry, prizes, refunds — all in SKR. Payouts create the winner's token account when needed.

SERVERLESS BACKEND

One Cloudflare Worker + D1, 5-minute cron. No servers to run. USD reference prices cached server-side. X + Telegram automation.

TRACTION (HONEST)

Figures in brackets are filled from the launch tournaments before submission

7

GAMES LIVE

Solana dApp Store since July 2026

[N]

PLAYERS

unique wallets in launch tournaments

[N]

PAID OUT

SOL + SKR, every tx on Solscan

[N]

DUEL ROOMS

settled on-chain

SHIPPED DURING THE HACKATHON WINDOW

Backend v2 (SKR, signed scores, proof) · client v1.1 in all 7 games · backend v3 duel rooms · client v1.2 (duels, ≈USD) · open-source kit published 20 Sep · proof web viewer

BUSINESS MODEL

Service fee on every pool — no house edge, no treasury risk

1–5%

TOURNAMENT FEE

daily 1 · weekly 3 · monthly 5

3–5%

DUEL ROOM FEE

SOL 3 · SKR 5 — rooms settle in minutes

0%

STORE COMMISSION

dApp Store vs 15–30% elsewhere

LATER

Sponsored pools (protocols / brands top up prizes) · premium unlocks $2.99 · tournament kit services for other studios

ZERO TREASURY RISK

Prizes = entries − fee. Refunds come from the same stakes. Network fees are paid out of the fee, never the prizes.

ROADMAP

NOW · Oct 2026

v1.2 in all 7 games: SKR pools, signed scores, proof, duel rooms, ≈USD. Store release 1.2.0. First real tournaments.

Q4 2026

Deterministic replay anti-cheat · sponsored SKR pools · Superteam / Seeker community rollouts

Q1 2027

Anchor escrow program · clan leagues · +10 games from the existing engine portfolio

Q2 2027

Localisation (TR, ES, PT-BR, ID, VI) · Play Solana PSG1 port · kit for external studios

OPEN SOURCE KIT

github.com/excobalab/exl-tourney · Apache-2.0

WHAT'S IN IT

Cloudflare Worker backend (tournaments + duels + settlement)

D1 schema and migrations

SOL / SKR payout builder with idempotent ATA creation

Flutter sheets: pay · sign · proof · duel rooms

Kotlin MWA 2.0 bridge

Docs: API · anti-cheat · SKR · duels

WHY IT HELPS THE ECOSYSTEM

Any Seeker game can add SOL / SKR tournaments and duel rooms in a day.

One fairness template — commit, burn, sign, settle, reveal — instead of every studio inventing its own.

A recurring, non-speculative SKR sink that scales with the number of games, not with hype.

TEAM & ASK

BERKAY AKINCI — FOUNDER

excobalab / Excoba Medikal Turizm A.Ş., Ankara.

Civil & geomatics engineer, M.Eng. technology management.

AI-native builder: 7 tournament games + backend shipped in 7 days (July); v1.1 in 7 games + duel backend in 2 days (Sept).

40-app Google Play portfolio, 8+ serverless products, 500+ automated tests across projects.

THE ASK

CLOCK IN prize + Solana Mobile Builder Grant to fund:

· deterministic replay anti-cheat

· Anchor escrow (audited)

· 20-game rollout on the existing engines

· sponsored SKR pools with ecosystem partners

Intros: SKR ecosystem projects for sponsored rooms; Seeker community leads for launch tournaments.
